Professional Summary

I am a software development professional with a diverse professional background including business, finance, sales and technical training which has given me a unique hybrid of skills. I have a demonstrated proficiency in C#, SQL, and a variety of Javascript frameworks. I have nearly 3 years of previous experience on Enterprise level, client facing web and mobile applications. Business leadership experience includes managing time-sensitive materials, streamlining processes, increasing revenue, and managing IT solutions. I practice agile methodologies on a daily basis.

EDUCATION

devCodeCamp, Milwaukee, WI   **October 2015 - April 2016**

devCodeCamp is an immersive 600 hour software development boot camp in C# .NET development with an introduction to Python, ASP.NET, and JavaScript. It involves paired programming, intense lectures, mentorship, and a wide variety of challenging individual and group projects.

University of Wisconsin - Milwaukee   2001 - 2003

Port Washington High School   1998 - 2001

- Project Coordination

- · Business Development
- · Sales
- · Insurance (Life/Health/LTC/DI)

APPLICATION DEVELOPMENT EXPERIENCE

I have extensive Enterprise level application development experience, having worked in all aspects of the Milwaukee Tool One-Key Inventory Management Solution, an ASP.NET MVC/Web API application. Since the time I joined Milwaukee Tool, we have been transitioning this application from a monolithic architecture to a microservice/serverless oriented architecture. This has given me extensive experience and training with AWS cloud computing, with specific expertise in AWS Lambda, DynamoDB, S3, SNS and SQS. I also work extensively within the Serverless framework.   I am in charge of all localization within the web application, as well as the implementation of our GDPR compliance
